

Tin Opener

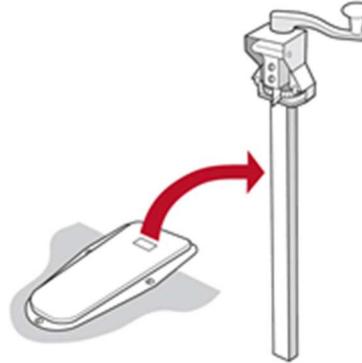

Operator to wear goggles, PVC or disposable apron and gloves when cleaning the machine.

DAILY

1

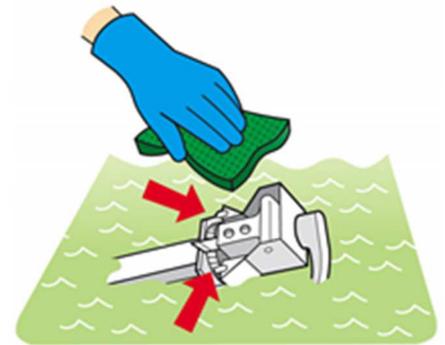

Remove the tin opener from the base plate which is attached to a table.

2

Place the opener in the sink full M1 Cleaning Detergent solution. Use a designated brush / scourer to **clean** all surfaces of the **opener**. Pay attention to the **blade, inside of opening mechanism** and the **rotating wheel**. Inspect the opening mechanism and if debris is still present then re-clean with M1.

Using a designated brush / scourer and **M1** Cleaning Detergent, **clean** the **base plate** of the opener which is still attached to the table.

3

Remove the opener from the sink and rinse with fresh water.

4

Replace the opener back onto the base plate and **spray** with **M2** Sanitiser. Allow the tin opener and base plate to air dry before re-use.
