

World Food Safety Day – Hand Hygiene Demonstration Event

Overview

An impactful event to run during World Food Safety Day is a hand hygiene demonstration. The event will include the utilisation of the downloadable resource material available from the Kersia UK website along with a UV Hand Hygiene Cabinet and UV Lotion. As a result, employees across the food & beverage sectors are able to learn about the importance of hand hygiene, while identifying common issues with their hand washing procedure with a view to improving their technique and thus help to reduce the potential risk to food and drink safety.

Objective

To raise awareness of personal hygiene and the importance of hand washing within a food and drink manufacturing workforce.

Available Resources and Tools

UV Hand Inspection Cabinet (TEST0108 or TEST0202)

These units are available for purchase by clicking on the link below:

<https://www.holchem.co.uk/shop/test-kits-and-inspection-equipment/hand-hygiene-sampling-devices/uv-inspection/uv-hand-inspection-cabinet/pid-1266/>

World Food Safety Day – Hand Hygiene Demonstration Event

Available Resources and Tools

Hand Washing Video

Available on YouTube

<https://youtu.be/fMfHJ8Pc8YQ>

To show on loop on a wall mounted screen if available in the demonstration area. Alternatively, run the video on loop via a laptop.

Site Requirements

There are a number of requirements and questions to ask prior to the event:

- The demonstration stand should ideally be located in a high traffic area, preferably the canteen or entrance to the factory / changing area providing there is sufficient room to avoid unnecessary disruption.
- Domestic plug socket near to the demonstration stand to allow the UV cabinet to be plugged in.
- Extension lead to be provided if necessary.
- Table to be available for the cabinet.
- Handwash sink near to the demonstration stand (hand soap and sanitiser available at the sink).
- Management commitment to co-ordinate the event and encourage staff engagement.
- TV screen available in the area to display the handwash video.
- Customer IT support to ensure Wi-Fi and internet connections and allow the video to run on loop.
