Hydrafeed

Rehydrating powder with additional electrolytes for use during challenging periods

ADVANTAGES

The **effervescent dietetic complementary feed** specially intended for young ruminants in times of risk of **digestive disorders** (diarrhea), during and after.

- ✓ **Complete intake of electrolytes**
- ✓ **Facilitates the physiological digestion**
- ✓ **Contains lactose**
- ✓ **Rapid energy intake**
- ✓ **Sodium Bicarbonate**
- ✓ **Buffering effect**
- ✓ **Effervescent and palatable pellets**
- ✓ **Pleasant small and good palatability thanks to vanilla aroma.**

WHEN & HOW

At times of risk of digestive disorders, during and after these.

DAY 1

Dissolve 1 dose 100g of Hydrafeed in 2L of lukewarm water and feed to the calf 2 to 3 times a day with meals.

DAY 2

If the calf shows sign of improvement, repeat the procedure from DAY 1

DAY 3

Same procedure as DAY 1. If no improvement is noted after 3 days, consult a veterinary surgeon.

One dose of 100g

TESTIMONIAL – Naomi Law – Fairfield Farm Devon

"Undoubtedly the most effective calf rehydration product I've used.

Mixes instantly, calves love the taste but more importantly they recover fast!"
